

## Viking Runes

The Vikings carved the straight-lined letters of their alphabet in stone, wood, bone and metal. These lines were first made on a stave- a series of lines that served as a guide for rune writing. It was made using straight sticks. You can trace any letter of the Viking alphabet on this stave.

Here is the 24 character Viking runic alphabet arranged following our alphabetical order.

### The Viking Runic Alphabet

---

Using runes, can you:

- Write out the alphabet (our style alphabet)?
- Write your name?
- Write a secret message sentence?
