

Year 1 Week 2 Science.

WALT: I can distinguish between an object and the material from which it is made.

What did we learn last week?

Different materials and what was made from them.

wool

brick

wood

rubber

Did you put paper in to water?

Is it water proof like the wellie boots?

Would you have a coat made of paper?

This can help you recognise different materials.

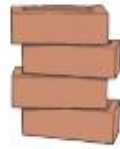

Materials and Their Properties

wood

metal

brick

ice

cloth

plastic

plastic

paper

metal

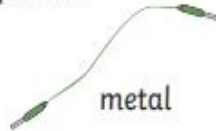

water

glass

stone

metal

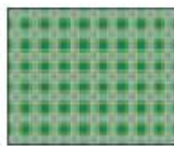

glass

leaves

plastic

fabric

wool

leather

Match the pictures to the words.

wood	glass	rock
plastic	metal	concrete

What is an object? What is a material?

An object is something that can be seen and touched.

Material is what the object is made from.

Question

Ask some silly questions!

What would happen if a crane was made of glass?

Ask your own silly questions and write them down.

Questions

Is a lego brick an object or a material?

Is rock a material or an object?

Draw a picture of a drinking glass made of rock and a wall made of glass.

Are the materials right for the objects? Write your answer down and explain.

Experiment

Have a look at your toys. Put them into groups of what material they are made from. Wood, plastic, metal or paper.

What are most of your toys made from?

Wood	Plastic
Metal	Paper
